Michael,

There is no screen on this logger, just a USB data port. I will download the data weekly.

Hi Greg- this data would be useful to correlate with measurements as well. Is it something that can be logged when collecting samples (e.g. taken from a screen) or easier to bulk download later?

Thanks,

Michael

Hi Oren & Avi:

Attached are the temperature and humidity data from the Dickson logger. I left one file as a DicksonWare .log file that the DicksonWare software should recognize. The second file was a text file that I converted to an Excel file. Please let me know if you have any questions. Currently, the temperature and humidity in Cincinnati are very low and are projected to remain that way through next week.

Dear Greg

I hope you are feeling well

My name is Oren Shtivy and I'm from Water-Gen company

First I want to thank you for your warm hospitality and to say that it was our pleasure to meet you

I would be very happy if you could send me the humidity and temperature data as we discussed

I hope you have a happy holiday

Regards

Oren Shtivy
